

Collaborative Resource Management in the Missouri River Basin
July 20-25, 2003, South Sioux City, Nebraska

COURSE OBJECTIVES

- *To develop an understanding of collaborative processes, with a particular focus on the roles of federal, tribal and state government personnel in these processes*
 - What are the benefits of and challenges to collaboration?
 - How can collaborative processes be designed and managed?
 - What are ways to foster and sustain success?
- *To learn from multiple perspectives and methods*
 - researchers, process facilitators, on-the-ground managers
 - simulations, case studies, interactive exercises, field trips, lectures, discussions, binder readings/handouts
- *To apply knowledge and tools to situations in the Missouri Basin*
 - strategy clinics, field trips
- *To foster relationships among managers in the Basin*
