Objectives of the Workshop

- To develop a better understanding of adaptive management:
  - its range of meanings and uses
  - key barriers
  - lessons from experience about how to be effective

- To focus on the real world challenges involved in implementing adaptive management at the project level, and build familiarity with a set of strategies for dealing with them

- To identify strategies to overcome institutional and policy barriers in order to improve the effectiveness of on-the-ground adaptive management efforts.

- To foster relationships between CalFed staff and individuals dealing with adaptive management in other contexts.

- To be as active and interactive as possible
