# TABLE OF CONTENTS

Chapter One: Introduction
- Why are partnerships developing? 3
- What challenges are partnerships facing? 8
- How can these obstacles be overcome? 10

Chapter Two: Methods
- Case Study Selection and Criteria 12
- Data Collection 14
- Analysis and Conclusions 15

Chapter Three: Summary of Case Studies
- The Blufflands Alliance 20
- The Bay Area Open Space Council 22
- The Michigan Dune Alliance 25
- The North Quabbin Regional Landscape Partnership 27
- The Northern Rockies Initiative 29

Chapter Four: Why Collaborate?
- Access to additional funding 32
- Increased organizational capacity 34
- Greater learning and networking opportunities 35
- Increased coordination of efforts 37
- Additional land protected 38
- Creation of a regional voice and identity 38
- Ability to work at a landscape scale 39

Chapter Five: Factors Contributing to the Success of Collaborative Efforts
- Informal structure of group 41
- Personalities 42
- Shared sense of place 43
- Local origins 43
- Favorable external environment 44
- Parity among participants 44
- Long time frame for operation 44

Chapter Six: Challenges of Collaboration
- Resources 46
- Maintenance of group momentum 46
- Members’ difficulties finding time 47
- Negative reactions of members’ constituents 47
- Maintaining access to additional funding 49
- Increased competition between groups 50
- Delayed accomplishments 50
- Organizational Structure 50
Difficulty working with a diverse set of organizations..............51
Duplication of effort.................................................51
Creating an effective structure.....................................52
Personalities.............................................................53
Vision.........................................................................54
Lack of a shared vision.................................................54
Dilemma of mission drift.............................................55

Chapter Seven: Potential Future Changes............................58
Locating additional funding...........................................58
Creating more formal structures.................................59
Clarifying shared vision.............................................60
Increasing land conservation.......................................61
Adding new members.................................................61
Expanding project types............................................62
Expanding scale of activities......................................63

Chapter Eight: Conclusions and Recommendations...............64
Conclusions...............................................................64
Summary of findings..................................................64
Unexpected results.....................................................66
Lessons learned regarding landscape-scale initiatives........69
Recommendations.....................................................72
Recommendations for group capacity building...............72
Recommendations for individual land trusts...............74

Appendices..................................................................77
Sample Interview Questions.......................................77

References Cited..........................................................78
