

# BEHAVIOR, EDUCATION AND COMMUNICATION MASTER OF SCIENCE

**TO RESPOND TO SUSTAINABILITY CHALLENGES, WE MUST UNDERSTAND THE CAUSES, DYNAMICS AND CONSEQUENCES OF HUMAN BEHAVIORS THAT AFFECT THE ENVIRONMENT.**

Creating a future that is inclusive, supportive and sustainable takes visionary thinkers and advocates who are ready to develop solutions that go beyond the status quo. The Behavior, Education and Communication (BEC) specialization will provide you with the skills needed to pursue a career that will lower communication barriers and make a positive impact on the future of our planet.

## WHY BEC?

- Understand human behavior—both current and evolutionary—in the context of the environment.
- Learn to share information effectively, use instructional and motivational techniques to encourage desired behaviors, and negotiate conflicts.
- Learn how people think, what motivates them, and the conditions under which they behave most reasonably and creatively.
- Develop conceptual frameworks and employ strategies to address environmental problems by motivating individuals, groups and communities to adopt impactful and durable behavior patterns.
- Work one-on-one with faculty advisors, practitioners and cohort members who are committed to uncovering effective, durable behavior change solutions.

## FACULTY

- Avik Basu
- Raymond De Young
- Alexandra Paige Fischer
- Nathaniel Geiger
- Jessica Michel
- Michaela Zint

## BOLD LEADERS

### JANA STEWART (MS/MPH '16) PROJECT MANAGER MICHIGAN VALUE COLLABORATIVE

“The work and classroom experiences I had during my time at U-M are a large reason why my employer was interested in working with me. They liked that I completed several internships and had practice applying for funding and IRB proposals. My master’s project, independent study, internships, and coursework all provided me with a wide range of skills for which I also had real-life practice. They wanted someone who could be a self-guided, independent employee with a lot of different skills, from education and public speaking to project management and grant writing.”

### CONNOR ROESSLER (MS '22) PROGRAM SPECIALIST GREAT LAKES COMMISSION

“I chose SEAS because I wanted to focus on place-based education and how to communicate that in relation to the environment. At SEAS, I gained an understanding of how to talk to different audiences, whether that is K-12 students, legislators or agency heads, which I do now. I learned how to translate interesting innovative science to a level that is understandable.”

# MASTER'S PROJECTS

Part of the culminating experience of your program is a master's project or master's thesis, where you will work with an external client to solve real-world problems. Recent projects include:

## ***Strengthening Tribal and University Relations on Sugar Island***

(Sault Ste. Marie, Michigan)

**Client:** Sault Ste. Marie Tribe of Chippewa Indians

**Advisors:** Kyle Whyte and Andy White

## ***Strengthening Disaster Resilience and Justice for Community-Based Organizations in Oregon***

**Client:** United Way of Mid-Willamette Valley and Trauma Informed Oregon

**Advisor:** Heidi Huber-Stearns

## ***Environmental Justice Coverage in the Great Lakes Region***

**Client:** Great Lakes Now

**Advisor:** Mike Shriberg

# COURSE SAMPLING

- The Psychology of Environmental Stewardship
- Advanced Education for Environment and Sustainability
- Behavior and Environment: Transitional Thinking for the New Normal
- Social Vulnerability and Adaptation to Environmental Change

# BUILD A REWARDING CAREER WITH IMPACT

No matter your path, SEAS Career Services helps prepare you for a purpose-driven career that's right for you. Our career counselors provide guidance on all aspects of career development, from resumes and cover letters to job searches and interview preparation. Plus, we connect you with employers and alumni who can help you imagine the possibilities of where your degree will take you.

## **BEC graduates work as:**

- Directors of education
- Education specialists
- Communications editors
- Environmental consultants

Here are just a few of the employers who hire BEC graduates:
