ROADMAP TO MENTORING

**Tips for Getting the Mentoring You Want:**
Consider what you personally need when meeting with your mentor
1. Set expectations, goals, requirements, agendas and keep notes
2. Develop a mentoring plan
3. Break tasks into manageable pieces
4. Be respectful of your mentor’s time and prioritize topics
5. Take the initiative and drive the partnership
6. Do an annual review of your progress and the mentoring relationship

**The process of mentoring is realized through 4 stages:**
1. **Developing a plan for mentee own development.** The essence of the stage is in setting up the protégé (mentee) for the results they seek, and the role of the mentor is reduced to observation and minimal assistance in the plan development.
2. **Independent learning.** At this stage, the role of the mentor is limited to help in non-standard situations and the maintenance of the protege's motivation.
3. **Support.** The most important stage. During this period the protégé will most often appeal to the mentor. However, an experienced mentor should not answer the question but only point to the source of knowledge.
4. **Evaluation of results.** Evaluation should be conducted by the protege, and the mentor should only indicate possible errors in the analysis.
